# Six star CNC420 stainless steel burr Evenly grinding and better flavour

Use six-star stainless steel burr, stronger and harder, 38mm diameter, sharp and efficient, Reduce fine powder rate, remain tasty coffee flavour.

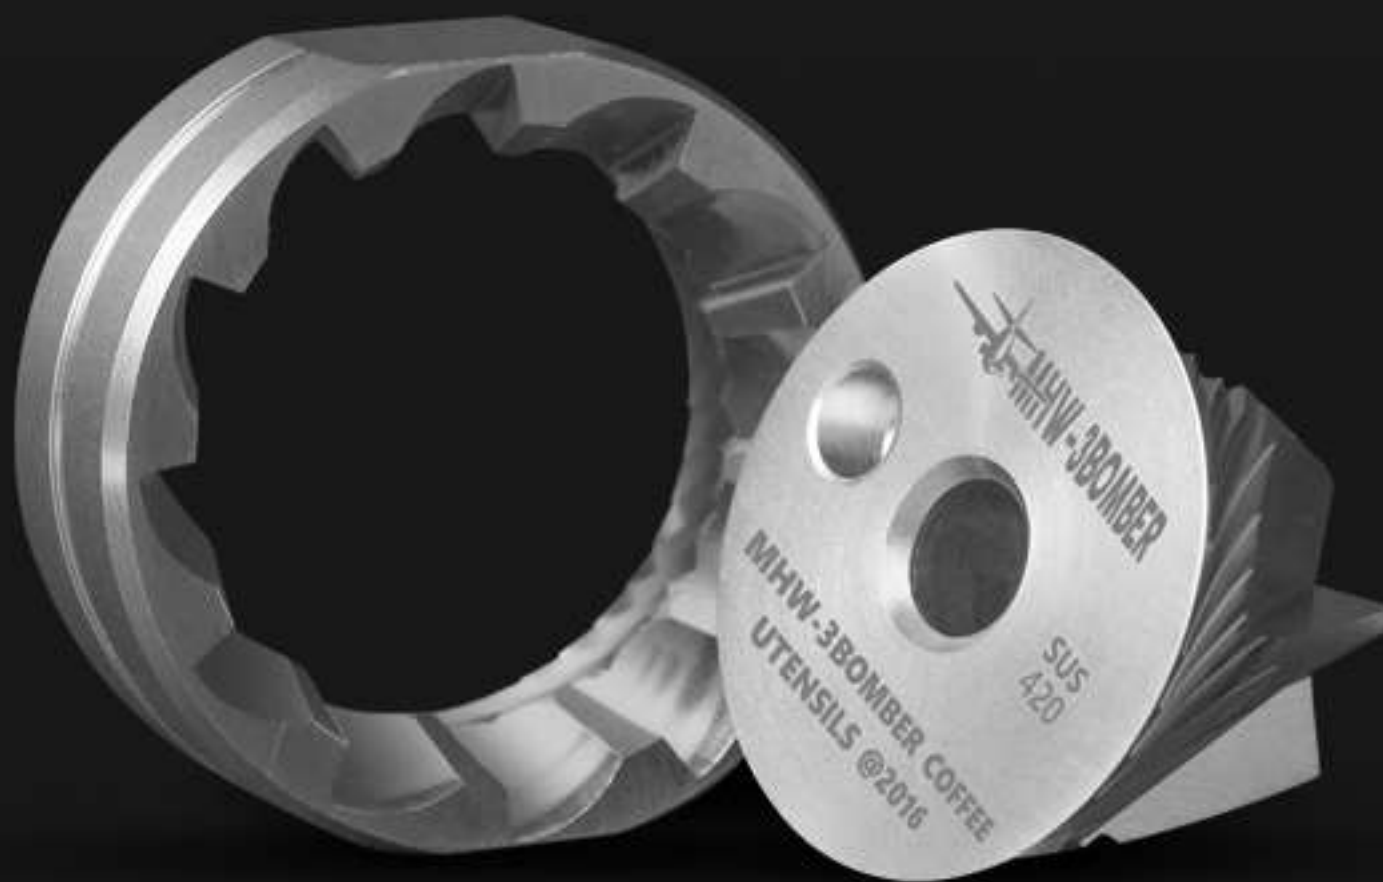

# Why we choose six star stainless steel burr?

Brings better flavour than traditional burr

		
Mode	Race M1	Traditional
Burr	Six-star	Five-star
Size	Φ38mm	Φ38mm
Material	SUS420	SUS304
Uniformity	★★★★★	★★★★☆
Flavour	Clear and well arranged	Balanced

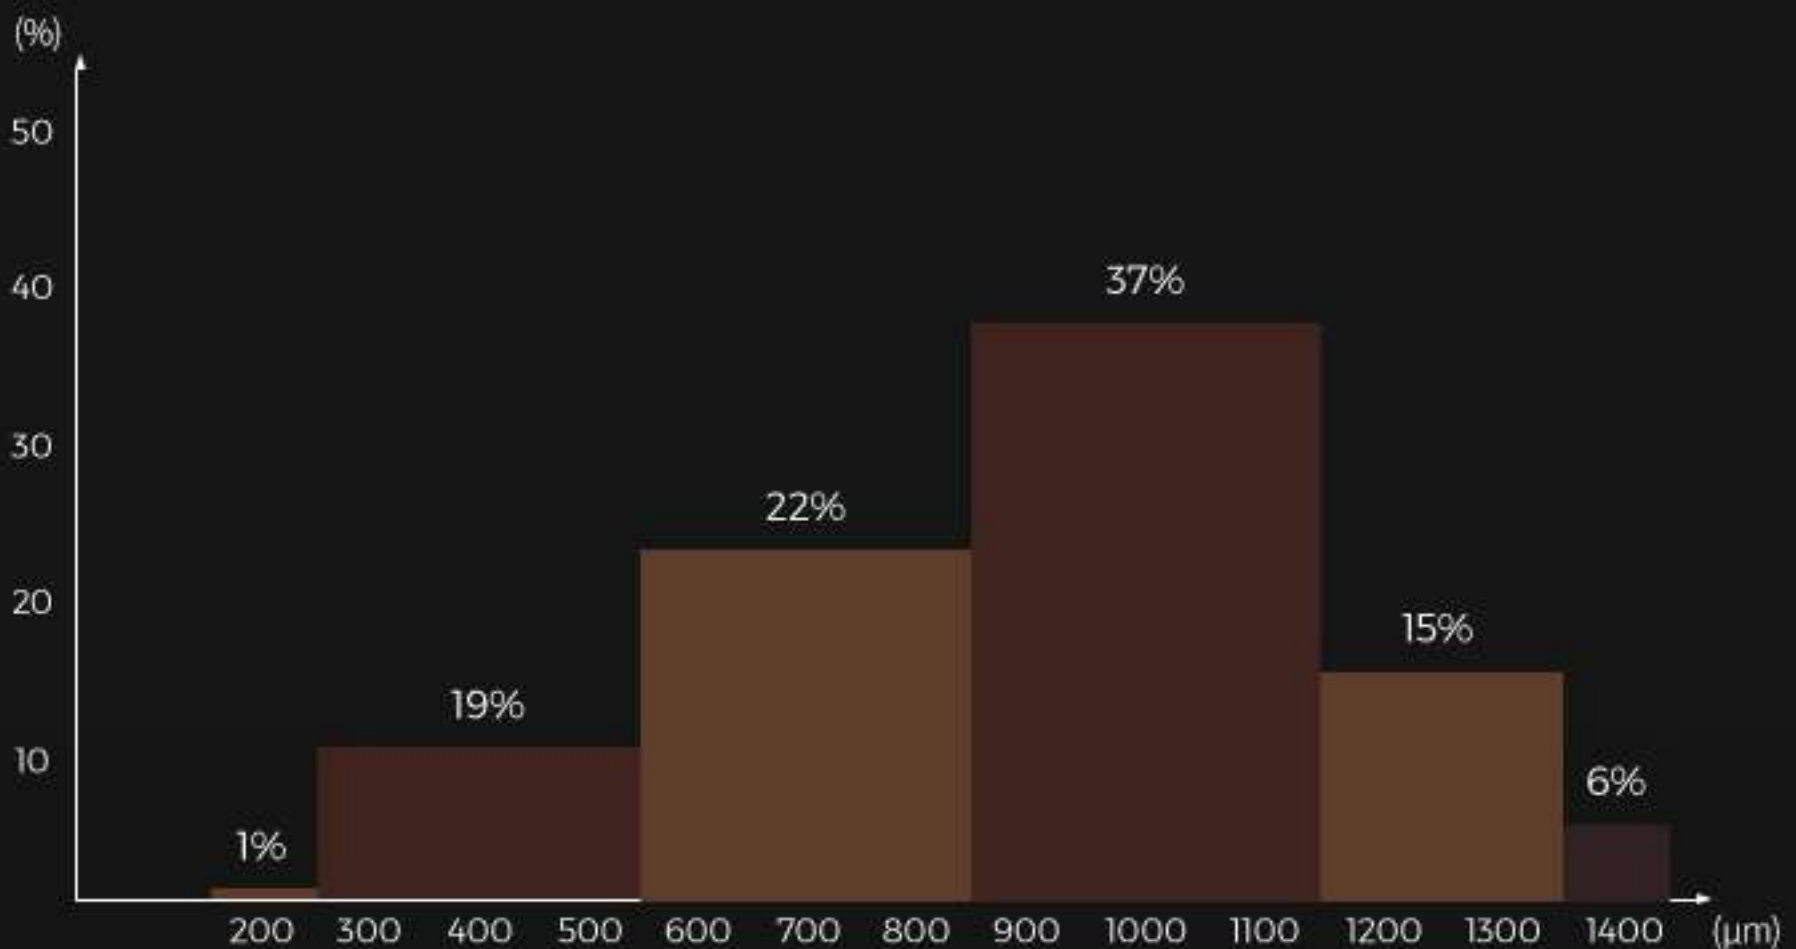

***Details make the performance better***

# SCA Cupping Standard

## Measurement of powder diameter distribution

The powder diameter of Race M1 shows a high concentration  
Uniformity increased and fine powder rate reduced

\*Cupping data, SCA standard 20# (Aperture 850μm) test

# Point to point adjustment

24 numbers of coarseness adjustment, let users adjust the coarseness more precisely Meet different needs like espresso, moka, drip coffee or french press

# Upgraded structure, allows deep cleaning

In daily use, if the grinder is not cleaned regularly, the residual old powder will pollute the newly ground coffee powder, resulting in flavor destruction. In order to deal with this problem, Racing M1 adopts a three-stage detachable structure to make cleaning a simple and comfortable process.

Race M1

Traditional

Traditional manual grinder often use two-section structure, resulting difficulty on thoroughly cleaning  
Race M1's burr was designed in seperately part, so as to clean it easily

\* This machine is equipped with precision parts. Please do not wash, clean with towel or cleaning brush;  
The edge of the core is sharp, please pay attention to avoid scratches.

# WARM PROMPT

Metal products occasionally have slight scratches, welding marks, hanging marks, grinding and other process marks are normal.

However, there will be differences in the texture and color of solid wood, and small tree scars and mineral lines are normal phenomena. It does not affect the beauty and practicality, but it is not a quality problem. The grade of products is not handicraft. Please know and understand.

## NOTES

1. This product is only designed to grind coffee beans, Please do not grind other material;
2. Be careful of the sharp metal burrs, keep kids from using it;
3. Keep it in a cool and dry place.
